

APC PRECISION ACID STAIN

APC PRECISION ACID STAIN - APC acid stains are ideal for decorative concrete applications including flatwork, countertops, stamped concrete and overlays. Attractively priced, **APC Precision Acid Stains** are suited for residential interior and exterior spaces as well as commercial applications including restaurants, retail, hospitality, shopping malls, theaters, theme parks, building entries, patios and sidewalks. The chemical reaction which occurs when **APC Precision Acid Stain** is applied to concrete creates rich, varying hues and tones. Make sure to finish the project by sealing and protection the surface with one of APC's decorative concrete sealer products to protect and enhance the lasting beauty of your design.

10 popular colors available. *Actual colors vary on each piece of concrete. Always test on your slab before use.
